

Ensemble Flashback @ EMS 24-31 January, 2019

 Published: 27 June 2018

Created in 2012 by Alexander Vert, the Ensemble Flashback includes performers, composers, visual artists and researchers into computer music, all with the common goal of supporting and promoting today's music and new technologies (gesture following, sound-image-gesture interaction, augmented instruments...).

Fundamentally focused on diverse expressions aimed at a wide audience, the group carries out various activities such as creation, distribution, research and development. It also organises cultural mediation and training activities around the projects it undertakes, at local, national and international levels.

Team present at EMS: Diego Tosi - violinist/performer, Alexander Vert - composer and director of the Ensemble Flashback, José-Miguel Fernandez - composer and computer music programmer, Thomas Penanguer - digital visual artist
