

Giuseppe Pisano @ EMS 11-16 November, 2019

 Published: 16 April 2019

Giuseppe Pisano (<http://www.giuseppepisano.com>) (b. 1991, Napoli) is an electroacoustic music composer based in Oslo.

His work is broadly concerned with the investigation of space as a compositional tool and the research of narrative possibilities in acousmatic music. Sound, in its phenomenology, contains deep references to personal anecdotes and subjective perceptual elements that can be extracted, objectivized and become the paradigm for a collective experience.

His aesthetic features the use of field recording and extensive processing techniques to emphasize the metaphorical elements of his sonic environments and filter poetic and synesthetic components that constitute the compositional frame in which listening happens.
