

2023

Fabian Lanzmaier @ EMS 19 October - 6 November, 2023

 Published: 02 January 2023

Fabian Lanzmaier works with sound and music, as a solo artist as well as in several formations combining sound with installations, theatre, dance, moving image and live performances.

He uses audio synthesis to explore aspects of texture and structure of sound as well as its presence within space. He is experimenting with perception and ideas of natural vs. artificial sounds, fluid and ambiguous environments. A maze into surreal surroundings of organic structures in constant movement and disruption.

He studied at the Institute for Electroacoustic Composition in Vienna and is an active member of the collectives

Columbosnext, Verschubu Records and velak.
