

Francesco Gagliardi @ EMS 1-15 June, 2016

 Published: 27 January 2016

Francesco Gagliardi (<http://www.francescogagliardi.altervista.com>) is a Milan-based experimental composer, sound designer and programmer. His sound research focuses on creating complex and chaotic soundscapes analyzing the threshold between signal and noise. Exploring circuit bending, self-built corrupted instruments and softwares, he aims to imagine other possible sound realities characterised by rough sounds, discontinued rhythms and digital warm noises.
