

Keith Fullerton Whitman @ EMS 28 Feb - 3 March, 2017

📅 Published: 28 January 2017

EMS welcomes Keith Fullerton Whitman (<http://www.keithfullertonwhitman.com/bio/>)! He is a composer & musician currently based in Melbourne, Australia. Beginning in the early 90's while working towards a Bachelor's Degree in "Music Synthesis" Degree at Boston's Berklee College of Music, Keith began exploring electronic music's many facets. These days his creative energies are largely put into the continued development of a singular take on "Live Electronic Music" incorporating an ever-changing hybrid software & hardware-based system that allows for the desired complexities of sound & vision. While this work has recently manifested itself as a pair of albums for Editions Mego entitled "Generators" & "Occlusions," it's largely intended for the stage.
