His work is broadly concerned with the investigation of space as a compositional tool, using field recording and extensive processing techniques aimed at emphasizing metaphorical elements of sounds and extracting anecdotes that underline poetic and synesthetic references to his personal experience.^{[1][2][3][4][5][6][7][8][9][10][11][12][13][14][15][16][17][18][19][20][21][22][23][24][25][26][27][28][29][30][31][32][33][34][35][36][37][38][39][40][41][42][43][44][45][46][47][48][49][50][51][52][53][54][55][56][57][58][59][60][61][62][63][64][65][66][67][68][69][70][71][72][73][74][75][76][77][78][79][80][81][82][83][84][85][86][87][88][89][90][91][92][93][94][95][96][97][98][99][100]}

His formal education includes studies of electroacoustic music composition and music technology in Italy, the Netherlands and Norway, especially in Oslo he focused his attention on immersive audio and spatialization techniques with Prof. Natasha Barrett.^{[1][2][3][4][5][6][7][8][9][10][11][12][13][14][15][16][17][18][19][20][21][22][23][24][25][26][27][28][29][30][31][32][33][34][35][36][37][38][39][40][41][42][43][44][45][46][47][48][49][50][51][52][53][54][55][56][57][58][59][60][61][62][63][64][65][66][67][68][69][70][71][72][73][74][75][76][77][78][79][80][81][82][83][84][85][86][87][88][89][90][91][92][93][94][95][96][97][98][99][100]}

At EMS he is aiming at acquiring a deeper knowledge of sound synthesis to include it in his workflow to a broader extent.
